

Agritourism Best Practices Checklist

The best practices described below are based on the <u>Compendium of Measures to Prevent</u> <u>Disease Associated with Animals in Public Settings</u>, 2013.

If you are a petting zoo operator, please use this checklist as a tool to design and operate your petting zoo according to the national standards. If you are hiring a petting zoo, please use this checklist to evaluate potential vendors.

Facility Design		
Handwashing stations		
☐ Running water		
☐ Accessible for children and persons with disabilities		
☐ Plan in place for restocking paper towels, soap, and water		
Hand sanitizer (should be used as a supplement to soap and water and does not replace soap and water for handwashing)		
☐ Plan in place for restocking hand sanitizer		
Petting of animals only allowed over/through barriers (fences); visitors not allowed in pens		
No physical contact by the public with chicks, ducklings, reptiles, calves, or dangerous and exotic animals (e.g., primates, wolf pups)		
No transport of manure/soiled bedding through public areas		
Transition area at entrance between non-animal and animal areas		
☐ Provide stroller and bag storage to keep items out of animal areas		
Transition area at exit as people leave animal space to non-animal space		
☐ Place handwashing stations position near exit so visitors can't miss them		
Visitor Education		
Educational messages in multiple formats (e.g., signs, videos, recorded messages, stickers, bracelets, interaction of staff and visitors, etc.)		
Signage in transition area at entrance		
☐ Animals can carry germs that can make people sick		
☐ No food or drink in animal areas		
\square No hand-to-mouth activities in the animal area (i.e., drinking, eating, bottles, pacifiers)		
Children under five years old, senior citizens, pregnant women, and people with chronic health conditions or a weakened immune system should be extra careful around animals		
Signage in transition area at exit		

PETTING ZOO BEST PRACTICES

	Wash hands thoroughly with soap and water immediately after visiting the animals
Staff	members present to encourage safe animal contact
	Remind visitors that animals can carry germs that make people sick
	Remind visitors to refrain from risky activities in the animal area (i.e., drinking, eating, bottles, pacifiers)
	Remind visitors to wash their hands after visiting the animal area
	Remind parents to supervise children with the animals
Anim	nal Care and Management
Sick	or injured animal(s) immediately removed, especially if they have diarrhea/scours
Man	ure/soiled bedding removed promptly
	Limit visitor contact with manure/soiled bedding by restricting access (e.g., use of double barriers, sweeping up walkways, use of solid bottom fencing, etc.)
Surfa	aces, especially pen railings, cleaned daily using soap and water
	nals housed in a way that minimizes stress and overcrowding (this will decrease the ount of pathogen shedding in their feces)
Feed	provided in containers that will not be confused as human food
☐ Vacc	inate animals against rabies
	Those with approved vaccine (e.g., dogs, cats, cattle, horses, sheep, etc.) should be vaccinated for rabies by your veterinarian. Animals without an approved vaccine (e.g., goats, llamas, camels, etc.) may be vaccinated off-label, by your veterinarian.
Staff	Education
Revie	ew best practices and recommendations from the Compendium on an annual basis
	Educate staff about the risk for disease and injury associated with animals
	Educate staff on how diseases are transmitted from animals to people
	Educate staff on prevention messages that should be shared with visitors
Ensu	re staff feel comfortable explaining these concepts to visitors
Expla	ain staff members' role(s) in the petting zoo
	Teach people about animals
	Teach people how to enjoy animals safely by following these best practices
